

Modo is a payments orchestration platform for enterprises. With one connection to Modo, you can reduce your total cost of payments, move your payments infrastructure to the cloud, and regain control of your payments data and money flows. Modo allows you to flexibly build the payments stack that makes the most sense for your business, and gain global access to the payment services and local payment methods you need to better serve your customers. Focus on your bottom line, and leave the payments plumbing to the #paymentsgeeks at Modo.

/Checkout

Modo's /Checkout product simplifies your payment operations when receiving funds from customers by orchestrating payments from beginning to end.

/Checkout Components

API - Orchestrate your digital and physical Checkouts with any combination of payments through a single API

Connectors - Access leading digital and physical payments services & methods of all kinds

Modal - Embedded customizable payment choice form for your business needs

Portal - Check on the health of your payments, determine what fees you're paying, and plan routes between payment service providers

Checkout COIN® - Performs real time accounting for any payment method using any payment service to ensure you get paid for what you sell

Vault - Hyper-compliant data vault using best in class security

The screenshot displays the Modo dashboard interface. On the left, there is a 'Config' section for creating a connector endpoint, showing details for 'Brazil Checkout Endpoint' with payment providers like 'adigen' and 'd-local'. The main 'Dashboard | Payments Insights' section features a line graph for 'Checkouts' and 'Abandons' over time, with a total checkout amount of \$52,187,561 and an abandonment rate of 3.18%. On the right, the 'Insights | Checkout Refund Activity' section shows a table of refund activity with columns for TRANS ID, TOTAL, ORDER, CUSTOMER, SERVICE, METHOD, TYPE, STATUS, and USER. The table lists various transactions with their respective statuses, such as 'Declined', 'Funded', 'Approved', 'Refunded', 'Completed', 'Cancelled', and 'Rejected'.

TRANS ID	TOTAL	ORDER	CUSTOMER	SERVICE	METHOD	TYPE	STATUS	USER
MDP1009	50.00	ORD0275	Erich Schulz	Adyen	Credit Card	Payment	Declined	Ryan Lee
MDP1010	125.00	ORD0275	Erich Schulz	Vantiv	VISA	Payment	Funded	Ryan Lee
MDP1011	75.00	ORD0275	Erich Schulz	Worldpay	Credit Card	Payment	Approved	Ryan Lee
MDP1012	35.00	ORD0275	Erich Schulz	FirstData	Credit Card	Payment	Refunded	Ryan Lee
MDP1013	130.00	ORD0275	Erich Schulz	Brainbow	Credit Card	Payment	Completed	Ryan Lee
MDP1014	150.00	ORD0275	Erich Schulz	PayPal	PayPal	Payment	Cancelled	Ryan Lee
MDP1015	170.00	ORD0275	Erich Schulz	Multiple	PayPal	Payment	Rejected	Ryan Lee
MDP1016	170.00	ORD0275	Erich Schulz	Multiple	PayPal	Payment	Rejected	Ryan Lee

Modo's Portal allows you to manage and maintain your entire payments stack in one place. Follow the lifecycle of every single transaction, perform refunds in the same way every time, add new payment methods, and get insights into the health of your payments, all in a user-friendly dashboard. And since the payments fun doesn't end until settlement and reconciliation, neither does Modo. Get unified reporting of your settlement and reconciliation files for every transaction in every currency - even if they're processed differently.

Enterprise Payments Environment

In the current state of payments, every integration requires tight coupling with systems of record from financial management to enterprise resource planning, with new connections taking 9 months to a year to complete. Modo streamlines clients' payments operations and allows them to integrate with new payment services in the click of a button.

WORLD WIDE OPERATIONS

As enterprises grow, their payments stack becomes more complex to serve their global customer base.

FRAGMENTED PROCESSES

Treasury and finance has to do everything eight different ways - from refunds to reconciliation.

UNIFIED OPERATIONS AND VISIBILITY

Modo created a unified approach and perspective of managing payment services.

Take control of your payments stack with Modo
