

Modo is a payments orchestration platform that builds bank-grade payment stacks for enterprises. With one connection to Modo, you can reduce your total cost of payments, move your payments infrastructure to the cloud, and regain control of your payments data and money flows. Modo allows you to flexibly build the payments stack that makes the most sense for your business, and gain global access to the payment services and local payment methods you need to better serve your business. Focus on your bottom line, and leave the payments plumbing to the #paymentsgeeks at Modo

## /Payout

Modo's /Payout product delivers access to physical and digital payment methods all around the globe. Choose how you want to send money to your customers, vendors, and partners.

### /Payout Components

**API** - Orchestrate your digital and physical disbursements with any combination of payments through a single API

**Modal** - Embedded customizable payment choice form for your business needs

**Payout COIN®** - Performs real time accounting for any payment method using any payment service to ensure you get paid for what you sell

**Connectors** - Access leading digital and physical payments services & methods of all kinds

**Portal** - Check on the health of your payments, determine what fees you're paying, and plan routes between payment service providers

**Vault** - Hyper-compliant data vault using best in class security

TRANS_NO	TOTAL	ORDER	CUSTOMER	SERVICE	METHOD	TYPE	STATUS
